

# INTERIOR PHILOSOPHY BY: HARDOOR

# Length:

The Hardoor System allows up to 2.5M span for a single door and up to 5M for a single wardrobe.

Hardoor's unique aligned door system provides the ability to connect an unlimited number of two-door wardrobes, which enables us to create a wardrobe of unlimited length.

# Height:

A door design which can stretch from floor to ceiling which provides a larger storage solution for the homeowner. The additional wardrobe space is easily accessible while continuing to provide an aesthetically pleasing finish.

# Profile:

Our focus is on providing a wardrobe system that is strong and durable whilst maintaining a visual appeal. Our system achieves this by combining a 4mm thin front profile with a high quality finish, together with a structurally sturdy build behind the door.

# Seamless Integration:

The ability to combine and align any number of wardrobes next to one another, gives the ability to create a seamless wall to wall finish, giving an unobtrusive storage solution that integrates with the design of room.

# Weight:

Hardoor's aligned door system can carry up to 120KG of door material. The superior strength of our system gives the ability to use a range of materials in construction, such as tempered glass doors and a variety of other heavy elements that are generally not available for door systems due to their weight.

Premium Wardrobes

# Stretchers:

Only Hardoor's aligned door system comes with built in stretchers in all four side profiles, which give the doors a counter "pull" against the weight of the material, thus contributing to longer life and durability of the profiles, the doors and consequently the wardrobe as a whole.

# Versatile:

The beauty of our versatile system is that it is not limited to built in wardrobes. Designers have integrated the system in a variety of ways to give a fresh, modern look when creating a division in rooms.

# SPACES:

A modern look to room division is easily created with the Hardoor system. A wide span door system which can be used for separating any space up to 5m. A luxurious WIR, and ensuite entry is only the beginning.

# Finish In Style:

## Make a statement with Hardoor

---
